

Pro-Kolin for Dogs and Cats

A highly palatable paste formulation containing beneficial microorganisms, kaolin and pectin, whose absorbent and soothing properties are well known.

- Soothes the gut lining during diarrhoeal upsets
- Contains Kaolin - a natural binding agent
- Includes beneficial microorganisms to rapidly populate the gastrointestinal tract
- Improves consistency of stools

Pro-Kolin for Dogs and Cats is a very palatable probiotic formulation containing kaolin and pectin, whose absorbent and soothing properties in the gut have been used for many years in the treatment of diarrhoea. The beneficial microorganisms contained in Pro-Kolin occur naturally in the gut of all health animals. These microorganisms colonise the immature gut or re-establish the disrupted gut, thus promoting the mechanism of competitive exclusion against potential pathogenic bacteria. This product contains Kaolin, a natural binding agent, and Pectin which soothes the gut lining during digestive upsets such as diarrhoea. Pro-Kolin for Dogs and Cats is formulated to reduce the use of antibiotics in mild gut upsets.

PRODUCT SPECIFICATIONS

Use	<i>Cats and puppies:</i> 1-2ml every 8 hours <i>Adult dogs:</i> 2-5ml every 8 hours Give by mouth for as long as considered necessary or as directed by a veterinary surgeon.
